APICe Publication Space .......................................................................................................................................................... 3
APICe Publication Space

Research and development work in APICe involves the use of a large amount of scientific publications, and produces a lot of original scientific materials. In order to help the many activities in APICe, a handy and precise representation of such a huge collection of pieces of scientific literature is certainly more than useful. This Publications space in the APICe space is meant to address such needs, by containing the scientific material considered relevant for the scientific and technical activities in APICe, either published directly by APICe people or by other researchers in the world.

- **All yet-unpublished works** ordered by status: Note, Draft, Submitted, Rejected, Accepted, Accepted with revision, Revised, Camera-ready sent, Proof, In press, Online

Also, publications in the APICe space are indexed per

- **Authors**
- **Editors**
- **Journal & Series**
- **Tags**
